

SAURABH KUMAR JHA

Senior Software Developer

Jhapyarela0@gmail.com | +91-9748210466 | Kolkata, India | [linkedin.com/in/saurabh66](https://www.linkedin.com/in/saurabh66)

CAREER SUMMARY

Backend-focused Software Developer with **3+ years of experience** designing and building scalable, object-oriented web applications, with a strong foundation in **Java and core OOP principles**. Experienced across the full backend lifecycle — REST API design, relational database modeling, workflow automation, and production debugging — gained delivering enterprise case-management and workflow systems in **PHP/Laravel and CodeIgniter**. Comfortable translating this backend architecture and API-design experience to **Java / Spring Boot** environments.

SKILLS

Core Language: Java (OOP concepts, Data Structures)
Also Proficient In: PHP, JavaScript, HTML, CSS
Frameworks: Laravel, CodeIgniter (transferable backend patterns)
Database: MySQL — schema design, query optimization, indexing
Tools: Git, REST APIs, Ajax, jQuery, JSON
Concepts: Object-Oriented Design, Data Structures, REST API Architecture, Workflow Automation

PROFESSIONAL EXPERIENCE

Kreate Technology — Senior Software Developer

Jan 2024 – Mar 2026

- Architected the CCPD Court Case Management System, a modular backend system enabling online complaint filing and end-to-end case tracking — applying OOP design principles for maintainability.
- Designed RESTful backend APIs and normalized relational database schemas for document management and workflow automation, following patterns directly analogous to Java/Spring Boot service-layer architecture.
- Optimized SQL queries and backend services, improving system performance and response times.
- Contributed to the DIAC Event Portal, supporting judicial process automation through structured backend workflows.

Capgemini — Software Developer

Jul 2023 – Jan 2024

- Maintained and enhanced backend modules of a large-scale Health Insurance platform, working within an object-oriented, service-based codebase.
- Diagnosed and resolved production issues at the API and database layer, improving application stability.
- Collaborated with QA and business teams to translate requirements into backend feature implementations and bug fixes.

Eclerx Services Pvt Ltd — Software Developer

Jun 2022 – Jun 2023

- Developed an internal Service Management Portal, structuring backend logic into reusable, object-oriented modules for workflow automation.
- Improved backend performance through database query optimization and indexing.

PROJECTS

Case Management System — CCPD

Jan 2024 – Dec 2024

Built with: PHP, Laravel, JavaScript, Bootstrap, MySQL (backend architecture transferable to Java/Spring Boot)

- Built a full-stack platform for online complaint filing, case tracking, and document management, with a layered backend structure separating controllers, services, and data access.
- Implemented role-based access control and RESTful backend APIs for efficient case workflow.

Case Management System — DIAC

Dec 2024 – Jun 2025

Built with: PHP, CodeIgniter, JavaScript, MySQL

- Developed an arbitration case filing portal enabling digital submission and structured case processing.
- Implemented automated, rule-based workflows for case assignment and department tracking — logic modeled as reusable service components.

MBKS Donation Portal

Jul 2025 – Dec 2025

Built with: Laravel, Bootstrap, MySQL

- Built a donation portal supporting families of soldiers, with secure, validated record management.
- Designed normalized backend data models and modules for donation tracking and contributor data management.

EDUCATION

Master of Computer Applications (MCA)

Aug 2021 – Jun 2023

Lovely Professional University, Punjab | CGPA: 7.40

Bachelor of Computer Applications (BCA)

Aug 2018 – Jul 2021

West Bengal University of Technology | CGPA: 8.29
